

**OrahSoft**

*Solution for all your  
computer needs*

# PORTFOLIO

## COMPANY BACKGROUND

---

**OrahSoft solutions** helps accelerate the development of software products and reduce time to market through its proven principles, methodologies, and tools. Our full lifecycle services include product development, testing and QA, sustenance, embedded engineering services, and embedded design. OrahSoft Solutions has helped people and small companies to ship some of the most widely used software products, on time and within budget.

### Objectives

Our business strategy will revolve around the need to provide product to our target customers, in the process fully satisfying their needs.

We design high quality software. We provide various information technology (IT) solutions and services, offers business consulting services, such as business engineering and performance management, application development and maintenance, web development, and enterprise application services.

We use all latest technologies in order to write high quality software. We work with different industries, such as education, financial Services, Banks, Credit Unions, Information Technology, Software, Hardware, Electronics, Media, Advertising, Publishing, Entertainment, Consulting, Legal, Engineering, Accounting, and other.

Our solutions:

- Develop high quality products to satisfied customers all of the time
- Custom E-Commerce Solutions
- Web design and development
- Application Development and Integration
- Database Design and Development
- Testing

## OUR PROJECTS

### Web based reporting applications

Silverlight application, written for Tacoma Power, one of our current clients. This application gets data from USGS site, processes the data, saves into the database, and displays in user-friendly format on the web site.

Dates period:

## Task Manager for Tacoma Power, which asynchronously manages multiple reporting tasks.

Task Manager application that can run and report status of any number of separate tasks that are querying multiple USGS Water sites for information. WCF service was used to update the Task Manager on the status of the tasks that were reporting their status to the service.

The screenshot displays the Tacoma Power Task Manager application. The interface is divided into a Control Panel on the left and a main Workspaces area. The Control Panel includes a 'View all tasks' link. The Workspaces area shows 'Current Tasks' and a status indicator 'Status: Connected to WCF Service'. A 'Commands' section on the left of the main area includes 'Start Tasks', 'Close Tasks', and 'Start Tasks Now'. The main area contains a table of tasks.

Task Description	Path	Run Interval	Run Minutes	Status
<b>Tasks</b>				
USGS	Task.exe	15 min		
USGS	Task.exe	5 min		
USGS	Task.exe	5 min		
USGS	Task.exe	5 min		
USGS	Task.exe	5 min

## Application Development and Integration

**Jobfolders** - is windows based application was created for Barryhund construction company located in San Francisco, CA is a simple structured file folder management tool. The target consumer for this application is the construction industry specifically the small to medium sub-contracting company. These companies commonly create folders on local or network drives and place project related files in these folders. This occurs in most offices the problem we are trying to solve is continuity and organizational. Because the end users are creating these folders manually the folders are a often incomplete.

**Jobfolders** is intended to simplify and streamline the job folder creation and management.

## Web design and development

Information Website for one of our clients in California, who is a pianist, as well as piano teacher. He has his own piano studio.

This website is developed in .NET using C# as a backend. It has photo gallery, scheduling application, contacts form, etc.

**Welcome!**

Thank you for taking time to learn about my piano studio. It is my goal to provide the best quality piano lessons to students of all ages and levels.

Music is an art form and it is my strong belief that students should not only learn piano technique with correct fingerings and notes, but most importantly should appreciate music as an art and therefore in my teachings I try to focus on the art form that can bring my students together and help them succeed in their everyday lives.

This website is designed to answer as many questions about my studio as possible. If you have any questions please do not hesitate to contact me.

## TESTIMONIALS

---

Very good experience. Will continue working with OrahSoft for a long time to come. Very good firm. I am lucky to have found them.

- Rex Klein

Test Tracker E-mail processor Project completed on time with no problems to report. Same quality performance on this project as on the previously completed projects. Thanks.

- Jack

This project went extremely well. The website changes and programming changes that were requested were accurate from the beginning. The project came in right on schedule. Thanks for job well done.

- Dmitriy Kosovski

This was not a large project, but all of the tasks were completed by Orahsoft exactly as defined and in the time frame that was specified. Thank you again for the quality effort.

- Ed Dinter

Orahsoft did great fine job on our project and delivered on time. Great communication skills and 1st rate technical knowledge. We will be using OrahSoft again in the near future.

- Bat Database

Great communication. Prompt delivery. Clean Code. Worked with me to make sure everything works as requested.

- Mary

This was a rather small project, but it went well also. I will continue to use Orahsoft as their quality and ability to meet time frames is excellent. Thanks again

- Dave Krontty
